

SIE Sustainable Industry Ecosystem

Elina Huculak, University of Vaasa
Dr. Ahm Shamsuzzoha, University of Vaasa

WP2 Skills Gaps & Course Recommendations

Course Design

Course recommendations were based upon skills & knowledge gaps identified within the SIE Consortium per an analysis of the course offerings of each partner University.

Degree Program	Initials	Department	Course Name	Main Course Instructor Name/Email	Education Level: Bachelors, Accreditation	Attached Syllabus/Learning OutLink/ Source
Master's Programme in Information an HV		Information and knowledge n TUO.412 Data and Software Business	Henri Pirkkalainen	Masters	MAB Management and busin Student understands the basic principles TUO.412: Data and Software	
Master's Programme in Information an HV		Information and knowledge n TUO.424 Information Analytics Semini Hongxiu Li		Masters	MAB Management and busin 1. The student is able to understand the TUO.424: Information Analy	
Master's Programme in Information an HV		Information and knowledge n TUO.410 Information Security Managi Karan Menon		Masters	MAB Management and busin After the course the student has a basic TUO.410: Information Secur	
Master's Programme in Industrial Engin HV		Industrial Engineering and Mi TUTA.330 Technology Strategy	Saku Mäkinen, Johanna Kirjavainen, Laura Valtio	Masters	MAB Management and busin After completing this course, the student TUTA.330: Technology Strat	
Master's Programme in Information Tei AS		Information Technology and C COMP.CS.300 Data Structures and Alg Matth Rintala		Masters	Information Technology and (After completing the course, the student COMP.CS.300 Data Structur	
Master's Programme in Information Tei AS		Information Technology and C MATH.MA.140 Vectors and Matrices Terhi Kaarakka		Masters	Information Technology and (In this course the student learns the basic MATH.MA.140 Vectors and	
Master's Programme in Information Tei AS		Information Technology and C MATH.APP.160 Differential and Integr Simo Ali-Löytty		Masters	Information Technology and (On this course the students learn basic MATH.APP.160 Differential	
Master's Programme in Information Tei AS		Information Technology and C MATH.APP.240 Fourier Methods Merja Laaksonen, Petteri Laakkonen		Masters	Information Technology and (After completing the course, a student k MATH.APP.240 Fourier Met

Example pulled from Work Package 2's course analysis data

WP2 Grouped Six Sectors Based upon Skills Linkages per the Gaps

Cybersecurity within the Context
of Manufacturing

Photovoltaic Systems Design
Engineering; End of Life
Applications for PV Cells

Industrial Symbiosis and Circular
Economy within Manufacturing
(recycling, resource efficiency, data
analysis)

Photonics Application
Potential within the
Manufacturing Sector

Environmental Goods and Services
Management

ICT Management Supporting
the Manufacturing Industry

Cybersecurity within the Context of Manufacturing Module Recommendations

Module 1

Introduction to Cybersecurity

Module 2

Cybercrimes and Attack Scenarios

Module 3

Data Security and Privacy

Module 4

Data Security and Privacy

Module 5

Management of Cybersecurity

Module 6

Advanced Cybersecurity

Industrial Symbiosis and Circular Economy within Manufacturing (recycling, resource efficiency, data analysis) Module Recommendations

Module 1

Transforming from linear towards circular business model

Module 2

Design Thinking (Reduce, Reuse, Refurbish, Remanufacture, Repair, Recycle)

Module 3

Sustainable business model in an industrial ecosystem (Supply chain management)

Module 4

Circular economy for achieving UN's SDG

Environmental Goods and Services Management Module Recommendations

Module 1

The application of Environmental Economics in the Manufacturing Sector

Module 2

Striving for Carbon Neutrality in the Manufacturing Supply Chain

Module 3

Climate Risk Management in the Transportation Sector

Photovoltaic Systems Design Engineering; End of Life Applications for PV Cells Module Recommendations

Module 1

Introduction to photovoltaic systems

Module 2

Design engineering

Module 3

Life cycle and end of life management

Module 4

Applications of Photovoltaic systems

Photonics Application Potential within the Manufacturing Sector Module Recommendations

Module 1

Smart Technology Applications in
Smart Cities

Module 2

Optical Metrology within the
Nanofilm Applications

Module 3

Photonics-based Technologies to
support Carbon Neutrality

ICT Management Supporting the Manufacturing Industry Module Recommendations

Module 1

Introduction to ICT

Module 3

ICT for Business

Module 2

Advanced ICT

Module 4

Interpersonal Skills

THANK YOU FOR YOUR TIME

*If you have any WP related questions,
